Summary

Computer Science and Engineering (Artificial Intelligence) undergraduate with a strong foundation in Python, C, and artificial intelligence. Experienced in developing AI-powered applications, voice assistants, and software solutions through academic projects, and a virtual internship.
Proficient in applying problem-solving and analytical skills to design efficient, user-centric applications while continuously exploring emerging technologies.
Possesses strong communication, teamwork, adaptability, and time management skills, enabling effective collaboration in diverse environments.
Passionate about leveraging AI and software engineering to solve real-world challenges, continuously enhancing technical expertise, and contributing to innovative, impactful technology solutions.

Education

2024 – Present
Greater Noida

Bachelor of Technology (CSE - AI), *Dr. APJ Abdul Kalam Technical University, Lucknow*
CGPA : 8.36

2023 – 2024
Noida

Senior Secondary (Class XII), *Central Board of Secondary Education, New Delhi*
(PCM Stream)
82.00%

2021 – 2022
Noida

Secondary (Class X), *Central Board of Secondary Education, New Delhi*
92.40%

Skills

Python
Developed automation scripts, AI applications, and data processing programs.
Worked on libraries and frameworks such as **Numpy, Pandas, Matplotlib, Flask,** etc.

MySQL
Designed and managed relational databases using SQL queries.

Prompt Engineering
Designed effective prompts to optimize AI model responses.

C
Developed structured programs using procedural programming and file handling.

HTML / CSS / JavaScript
Developed responsive, interactive, and user-friendly websites using core front-end web technologies.

Data Structures & Algorithms
Solved programming problems using efficient algorithms and data structures.

Java
Built object-oriented CLI based applications using OOP concepts.

Git & GitHub
Managed version control and collaborated using Git workflows.

Professional Skills
- Problem Solving
- Analytical Thinking
- Teamwork & Collaboration
- Communication Skills
- Leadership
- Time Management

Internships

01/2026 – 03/2026
Virtual Internship
EduSkills Academy, *Advanced Robotics using AI and IoT Internship*

09/2025 – 10/2025
Virtual Internship
Edunet Foundation, *AI & Cloud Technology Intern*

08/2025 – 09/2025
Virtual Internship
CodSoft, *Artificial intelligence Intern*

Certificates

Problem Solving Certification
HackerRank

Python (basic) Certification
HackerRank

Python Certification
OneRoadmap

SQL Certification
OneRoadmap

Augmented Reality Workshop
Bharat XR

BCG - GenAI Job Simulation
Forage

Achievements

1st Position
Winner of Ideathon at Techinertia 3.0 organised at GNIT (IPU), Greater Noida
Greater Noida Institute of Technology

Other Achievements

- Finalist of Daksh Hackathon 2025 organised of G.L. Bajaj Institute of Technology and management, Greater Noida.
- Maintained a CGPA above 8.0 throughout the B.Tech. program.
- Consistently scored above 7.5 SGPA in every semester.
- Secured 92.4% in Class X Board Examination.
- Volunteered and co-ordinated in various technical events successfully.
- Engaged in various hackathons and technical competitions focused on software development, artificial intelligence, and innovation, gaining hands-on experience in rapid prototyping and collaborative development.

Projects

AI Mental Wellness Voice Assistant
Built an AI-powered voice assistant that provides mental wellness support through natural language conversations and speech interaction.
Technologies Used : Python, Flask, Google Gemini API, gTTS, SpeechRecognition, Pygame

AI-based Movie Recommendation System
Developed a movie recommendation application that suggests movies based on user preferences through an interactive web interface.
Technologies Used : Python, Streamlit

Rock-Paper-Scissors Hand Gesture Game
Developed a computer vision-based Rock-Paper-Scissors game that recognizes hand gestures using a webcam.
Technologies Used : Python, OpenCV, MediaPipe

Voice-Controlled Music Player Assistant
Developed a Python-based voice-controlled music player that recognizes spoken commands and plays songs by opening predefined YouTube links stored in a dictionary.
Technologies Used : Python, SpeechRecognition, gTTS, webbrowser module

Courses

05/2026 **AI Skills Passport,** *Microsoft & EY*

Interests

Artificial Intelligence • Machine learning • Data Analytics • Music • Cricket • Chess • Diary Writing
